Press Release

Association of NSW Regional Conservatoriums

NSW Regional Conservatoriums are extremely grateful for the recent announcement of an increase of \$2.1 Million across the (17 organisation) program.

This is a welcome injection of funds since the last increase in recurrent funding for the program was announced in 2001.

This increase will allow regional conservatoriums to deliver improved music education and performance services to rural and regional NSW. It will also greatly enhance the access for many isolated students to services many metropolitan students take for granted.

Graham Sattler, Director of the Orange Regional Conservatorium, said that he is pleased with the increase and looks forward to working closely with the Premier and government to further enhance music education in our region.
